BGIN Block#12 @Tokyo, Japan

Day 1 (March 2nd, Sunday) Venue: Dragon Gate, Shibuya Parco DG Bldg., 15-1 Udagawa-cho, Shibuya-ku, Tokyo 150-0042, Japan				
Time	Room	Session and Topics		
8:30-9:00		Registration		
9:00-9:30		Opening		**P** = in person **R** = remote
9:30-11:00	Workshop [Room A]	**Security Assessment and Development of ST/PP**		**P Tomofumi Okubo [Moderator]** **P Eric Burger (Virginia Tech University)** **R Marc Krisjanous (CCSS)**
		WG: CS	Status: 3. Item Creation for New Project	
		Description: This session focuses on establishing standardized Security Targets (ST) and Protection Profiles (PP) for blockchain and applications utilizing cryptographic key management. We will identify key assets and security requirements, develop standardized STs for various application types, and create reusable PPs. This framework will address key management challenges in decentralized systems, ensuring robust security for blockchain-enabled applications. The goal of this session is to gauge the level of interest in these topics and formally adopt them as work items.

11:00-11:30		Break		
11:30-13:00	Workshop [Room A]	**The Mutual Impact and Improved Outcomes of Blockchain & AI**		
		WG: FASE	Status: 2. Document Mid-Review	**P Leon Molchanovsky [Moderator]** **P Michell Travers (Soulbis)** **R Joseph Beverley (SingularityNET)** **R Gayan Benedict (MIT)**
		Description: The convergence of blockchain and AI offers groundbreaking potential. Whether leveraging blockchain to solve AI's data management challenges or harnessing AI to tackle governance issues in blockchain, the synergies between these technologies are being hotly debated. This discussion will take a futuristic lens, weighing both the positive and negative aspects of these synergistic applications, drawing from real-world use cases. The conversation will be grounded in research conducted in the BGIN Financial Application & Social Economics Working Group.

11:30-13:00	Workshop [Room B]	**Lessons in Smart Contract Security: Insights from the Recent Crypto Exchange Hack**		
		WG: CS	Status: 3. Item Creation for New Project	**P Shin'ichiro Matsuo [Georgetown Univ]** **P Tomofumi Okubo (Penguin Securities)** **P Eric Burger (Virginia Tech University)** **P Carole House (ex- White House)** **P Arianna Trozze (Elliptic)** **P Chengyi Ong (Chainalysis)** **P Yasuhiro Sasaki (JPCrypto-ISAC)** **R Marc Krisjanous (CCSS)** **R Samczsun (SEAL-ISAC)** **R Rex Zhang (OneInfinity) *recording**
		This session aims to discuss with cybersecurity experts regarding the methods and vulnerabilities related to the recent hacking incident involving Bybit. - Presentation by experts on what is known about the incident as of March 2 (20 minutes) - Q&A session regarding the presentation (40 minutes) - Discussion on the actions stakeholders should take in response to the incident (30 minutes)

13:00-14:30		Lunch (Lunch will not be provided, but participants can go to restaurants nearby together.)	
14:30-16:00	Workshop [Room A]	**Cybersecurity Education** WG: CS / Status: 3. Item Creation for New Project Description: This working group session tackles the critical need for comprehensive cybersecurity education within the blockchain ecosystem. Recognizing the diverse stakeholders – developers, users, investors, and policymakers – we will explore effective strategies for raising awareness of prevalent threats like smart contract vulnerabilities and private key compromise. The session will focus on promoting best practices for secure coding, responsible key management, and safe user behavior. Furthermore, it will delve into developing tailored educational resources and fostering collaboration to empower all stakeholders in building a more secure and resilient decentralized future. The goal of this session is to gauge the level of interest in this topic and formally adopt them as work items.	**P Shin'ichiro Matsuo[Moderator]** **P Eric Burger (Virginia Tech University)** **P Hayato Shigekawa (Chainalysis)** **P Tomofumi Okubo (Penguin Securities)** **R Marc Krisjanous (CCSS)**

16:00-16:30		Break	
16:30-18:00	Workshop [Room A]	**Layer2 Governance** WG: IKP / Status: 2: Document Mid-Review Description: As "Layer 2" scaling solutions emerge to address the scalability and cost-efficiency challenges of "Layer 1" blockchains, they could bring new governance and security challenges, as described in "Blockchain Trilemma." The ongoing research at BGIN IKP WG objectively analyzes the trust points that can be created by "Layer 2." Based on the research, this discussion will engage business operators, regulators, and technical experts to explore how to solve the security and governance challenges.	**P Takaya Sugino [Moderator]** **P Mitchell Travers [Moderator]** **R Gayan Benedict (MIT)**

16:30-18:00	Workshop [Room B]	**ZKP and its Viable Use Cases** WG: IKP / Status: 1. Document Approval Description: This project explores Zero-Knowledge Proof (ZKP) technology, focusing on its definitions, terminology, and advancements. It examines ZKP's backend, frontend, and historical development while analyzing its societal impact, including specialized programming tools, performance trade-offs, vulnerabilities, and applications. Special attention is given to zkRollup technology, its history, and concerns, highlighting ZKP's role in advancing privacy and blockchain innovation.	**P Shin'ichiro Matsuo [Moderator]** **R Leona Hioki (INTMAX) *recording**

Day 2 (March 3rd, Monday) Venue: Dragon Gate, Shibuya Parco DG Bldg., 15-1 Udagawa-cho, Shibuya-ku, Tokyo 150-0042, Japan

Time	Room	Session and Topics		
8:30-9:00		Registration		
9:00-10:30	Workshop [Room A]	**Cyber Security Information Sharing Framework**		**P Tomofumi Okubo [Moderator]** **P Shin'ichiro Matsuo (Georgetown Univ)** **P Carole House (ex White House)** **P Eric Burger (Virginia Tech)** **P Gananand Kini (MITRE)** **P Yasuhiro Sasaki (JPCrypto-ISAC)** **P Miho Hirashita (Crypto Garage)** **R Justine Bone (CRYPTOISAC)** **R Marc Krisjanous (CCSS)** **R Samczsun (SEAL-ISAC)**
		WG: CS	Status: 2. Document Mid-Review	
		Description: The rapid growth of the crypto industry has been accompanied by a surge in sophisticated cyberattacks, including DeFi exploits and NFT theft. These incidents highlight the urgent need for a robust, international information-sharing framework tailored to the unique challenges of this decentralized and rapidly evolving landscape. By enabling early threat detection, proactive vulnerability mitigation, and coordinated incident response, such a framework can significantly enhance the security posture of the entire ecosystem. This discussion will explore key features and mechanisms for establishing this framework, drawing lessons from traditional finance and other sectors, and will encourage active participation from all stakeholders in shaping its development. - Lecture: Existing Cyber Security Framework (NIST) - Introduction of the current document - Recap of discussions at Block 11 and preliminary discussions at Cyber Security WG (WG Chair) - Discussion of the current document and additional contents - Collaboration with other organizations (ISO TC307, CCSS, etc.) - Future works and timeline to publish

9:00-10:30	Workshop [Room B]	**Transition to Post-Quantum Cryptography / Crypto Agility**		**P Shin'ichiro Matsuo[Moderator]** **R Long Meng *recording**
		WG: CS	Status: 3. Item Creation for New Project	
		Description: This session kicks off a series focused on standardizing post-quantum cryptography (PQC) implementation for blockchain-enabled applications that also utilize public key cryptography. We begin by recapping existing PQC discussions and advancements across various communities and industries, including NIST standardization efforts, industry consortia initiatives, and academic research. We'll then provide a concise introduction to the unique challenges and opportunities presented by PQC in the context of blockchain. The goal of this session is to gauge the level of interest in this topic and formally adopt them as work items.

10:30-11:00		Break		
11:00-12:30	Workshop [Room A]	**Cyber Security Information Sharing Framework**		**P Tomofumi Okubo [Moderator]** **P Shin'ichiro Matsuo (Georgetown Univ)** **P Carole House (ex White House)** **P Eric Burger (Virginia Tech)** **P Gananand Kini (MITRE)** **P Yasuhiro Sasaki (JPCrypto-ISAC)** **P Miho Hirashita (Crypto Garage)** **R Justine Bone (CRYPTOISAC)** **R Marc Krisjanous (CCSS)**
		WG: CS	Status: 3. Item Creation for New Project	
		Description: The blockchain industry faces a growing number of sophisticated cyberattacks, necessitating a collaborative approach to cybersecurity. This session explores the critical need for an international information-sharing framework tailored to the unique challenges of this decentralized and rapidly		

		evolving landscape. We will analyze existing cybersecurity initiatives, including the operation of Information Sharing and Analysis Centers (ISACs), identify gaps in current operational standards and technologies, and propose solutions for effective information sharing among stakeholders in the blockchain ecosystem.
		
		- Lecture: Lessons learned from other ISAC
		- Introduction of existing activities of information sharing and current operation Standard
		  - CryptoISAC
		  - SEAL ISAC
		  - JP Crypto ISAC
		- Missing technology and operational standards specific to blockchain technology
		- How do other stakeholders than blockchain operators understand the information shared?
			R Samczsun (SEAL-ISAC)

11:00-12:30	Workshop [Room B]	**Tokenization Initiatives** WG: FASE — Status: 3. Item Creation for New Project Description: Part 1 of this session will cover interoperability models such as Global Layer 1 and Project Agora, focusing on connecting applications, smart contracts, platforms, and wallets. The discussion will cover the need for advancements in bridging mechanisms, composability, and regulatory-compliant token standards. Part 2 will delve into models for enabling interoperability between Central Bank and Commercial Bank Digital Currencies, aiming to create a secure and integrated digital currency ecosystem.	**P Jumpei Miwa (Recruit)** **P Kazuki Yoshihara (JP Morgan)** **P Nobuyasu Sugimoto (IMF)** **P Shun Kobayashi (Bank of Japan)** **P Vincent PEK (MAS)** **P Takashi Kaneko (SMTB)**

12:40-12:50	Keynote	By **Mamoru Yanase, JFSA Deputy Director General**	
12:50-13:50	Lunch	Lunch will not be provided, but participants can go to the cafeteria nearby together.	
13:50-14:30		**Plenary: BGIN Governance**	
14:30-16:00	Workshop [Room A]	**Stablecoin Challenges** WG: FASE — Status: 2. Document Mid-Review Description: In this session, we will first discuss BGIN's draft study report on the international comparison of stablecoin regulations. Following that, we will introduce and discuss the JFSA's research on illicit activities involving stablecoins and corresponding countermeasures. Additionally, we will present research on algorithmic stablecoiSns and engage in further discussions on the topic.	**P Takaya Sugino [Moderator]** **P Leon Molchanovsky [Moderator]** **P Ryu Takagi (Deloitte)** **P Ken Katayama (NRI)** **P Chengyi Ong (Chainalysis)** **P Nobuyasu Sugimoto (IMF)** **R Chloe White (Genesis Block)** **R Bruno Woltzenlogel Paleo (Djed Alliance)**

14:30-16:00	Workshop [Room B]	**Blockchain Analysis and Forensic Analysis** WG: IKP — Status: 2. Document Mid-Review	**P Mitchell Travers [Moderator]** **P Amanda Wick (Incite Consulting)** **P Hayato Shigekawa (Chainalysis)**

		Description: This session will address the challenges and innovations in blockchain analysis, focusing on client education, evidence gathering, and proactive detection methodologies. Key topics include FATF compliance for VASPs, the role of blockchain analytics firms, and the impact of privacy technologies and off-chain transactions on analysis. Participants will explore the role of BGIN in enhancing education and discuss strategies to overcome these challenges, aiming to create a comprehensive document for the IKP WG.	**P Arianna Trozze (Elliptic)** **R Andrey K (University of Notre Dame)**
		Related Documents: IKP_Forensics or Analysis	
16:00-16:30	Break		
16:30-18:00	Workshop [Room A]	**Wallet Governance and Credential Management** WG: IKP / Status: 1. Document Approval Description: In this session, we will discuss (1) the approaches to authentication processes that support the reliability and functionality of credentials, (2) key management methods that prioritize privacy and security, and (3) governance models that harmonize diverse legal, technical, and operational frameworks across different jurisdictions and sectors in order to build a secure, highly interoperable, and universally accessible digital wallet ecosystem. We will discuss the "Wallet Governance and Policy Study Report." currently in development, and the "Accountable Wallet" as a method to prove one's legitimacy using verifiable credentials.	**P Mitchell Travers [Moderator]** **P Saki Otsuki (NEC)** **P Masato Yamanaka (SMTB)** **P Ken Katayama (NRI)** **P Nat Sakimura (OpenID Foundation)** **R Kigen Fukuda (Virginia Tech)**

16:30-18:00	Workshop [Room B]	**Financial Stability of Decentralized Finance** WG: FASE / Status: 2. Document Mid-Review Description: This research analyzes the systemic risks posed by leveraged staking mechanisms, such as Liquid Staking, Restaking, and Liquid Restaking, within Ethereum's decentralized financial system. Drawing on methods used in traditional finance for analyzing vulnerabilities and shocks to financial stability, the study introduces an analysis of vulnerabilities and shocks associated with leveraged staking. As a next step, it explores how to conduct quantitative analyses and assess spillover risks to the traditional financial system.	**P Takaya Sugino [Moderator]** **P Nobuyasu Sugimoto (IMF)** **P Jack Deeb (Pier Two)** **R Benjamin Kraner (UZH)** **R James Angel (Georgetown University)**
